**The Indiantown Airport offers both aircraft and industry plenty of room and plenty of routes for takeoff.**

All sites are adjacent to the Airport and the longest grass runway in the U.S. In addition to its commercial and industrial utility, the airport's 6300-foot runway is also popular for Tail Wheel pilot instruction. Classic aircraft are taking off at the Indiantown Airport—so are thriving businesses!

**Uniquely located as part of Florida's designed State Intermodal System, Indiantown is a transportation hub with connectivity via highway, rail, waterway and air.**
